

# JolaMobile

**JolaMobile** is a cost effective and flexible SIM-only business mobile service, which can easily be managed in our online management portal, Mobile Manager.

Features	Potential Benefits
SIM-only	Retain your existing handsets or upgrade to new handsets without being tied to an airtime contract and a fixed term.
Range of cost-effective tariffs	Choose from voice, voice and data and data-only tariffs, UK, European and Global packages.
Fixed IP SIMs	Our 4G fixed IP SIM cards give you a connection to the mobile Internet with a public IP address. You can connect to your 4G device from anywhere in the world and use port forwarding to connect devices to your router. Our Fixed IP Failover SIMs are available on the Vodafone network on 12-month contracts. They are designed to be used as a backup for when primary services fail. Users pay a small monthly fee for the service and only pay for additional usage in the months in which they use it. The bolt-on selected is automatically triggered when the initial data allowance is exceeded. SIMs will bar when total monthly allowance is reached, however SIMs can be unbarred and a higher bolt-on added. Please note that there can be a delay of up to 24hours on SIM bars so please choose your initial bolt-on carefully.
30 day rolling contract	You are not committed to a 12, 24 or 36 month contract, so can terminate individual SIMs with a month's notice. This means that your customers won't need to have employees coming out of contract at different times or be left footing the bill until the end of the contract if an employee leaves.
Choice of mobile networks	Our range of UK SIMs are available on either Vodafone or O2 networks. Our Fixed IP SIMs are only available on the Vodafone network. JolaMobile supports 4G as standard as well as 3G.
Business-grade Service Level Agreement	24/7 access to Jola's Technical Support Team.
Online management portal	Mobile Manager is our online management portal for ordering and managing estates of mobile data SIMs. Manage activations, ceases, suspensions, reports, alerts and bolt-ons for both Vodafone and O2 SIMs in real-time.
