

JolaMobile

JolaMobile is a cost effective and flexible SIM-only business mobile service, which can easily be managed in our online management portal, Mobile Manager.

Features	Potential Benefits
SIM-only	Retain your existing handsets or upgrade to new handsets without being tied to an airtime contract. Many of our SIM packages are available on 30 day terms.
Range of cost-effective tariffs	Choose from voice, voice and data and data-only tariffs, UK, European and Global packages.
Fixed IP SIMs	Our 4G fixed IP SIM cards give you a connection to the mobile Internet with a public IP address. You can connect to your 4G device from anywhere in the world and use port forwarding to connect devices to your router. Our Fixed IP Failover SIMs are available on the Vodafone network on 12-month contracts. They are designed to be used as a backup for when primary services fail. Users pay a small monthly fee for the service and only pay for additional usage in the months in which they use it. The bolt-on selected is automatically triggered when the initial data allowance is exceeded. SIMs will bar when total monthly allowance is reached, however SIMs can be unbarred and a higher bolt-on added. Please note that there can be a delay of up to 24hours on SIM bars so please choose your initial bolt-on carefully.
EE M2M Roaming SIMs	Our EE M2M roaming SIMs are designed for M2M applications that require the EE network in the UK, EU and USA. They offer exceptional reliability and coverage and are now easy to manage and inexpensive to buy.
Multi-network EU Roaming SIMs	Our multi-network EU roaming SIMs are designed for applications where it is critical to have an internet connection available 24/7, even in situations where one or more mobile networks become unavailable. These SIM cards have no preferred network, therefore always connect to the strongest 4G signal whether at home or abroad. They offer exceptional reliability and coverage and are now easy to manage and inexpensive to buy. Packages also available with SMS enabled.
Choice of mobile networks	Our range of UK voice and data SIMs are available on either Vodafone or O2 networks. Our UK data-only SIMs are available on Vodafone, O2 or EE networks. Our Fixed IP SIMs are available on Vodafone and EE networks. JolaMobile supports 4G as standard as well as 3G.
Data Pools	<p>Partners select the type of data pool they require e.g. a Fixed Pool from 25GB to 10TB monthly data allowance, an Aggregated Pool, which changes size every time a SIM with data is added or removed or a Buffer Pool. Buffer Pools operate at an Account Level and can reduce data overage charges significantly. Data Buckets are available in 1TB increments and expire when the data is fully consumed or when it reaches its 12-month expiry date – whichever happens first.</p> <p>Fixed Pools are available for EE, EE Fixed IP, Multi-network, O2, Vodafone and Vodafone Fixed IP SIMs. Aggregated Pools are available for EE, EE Fixed IP, Multi-network and Vodafone Fixed IP SIMs. Buffer Pools are available EE, EE Fixed IP, Multi-network, O2, Vodafone and Vodafone Fixed IP SIMs. Data Buckets are available for EE M2M, EE Fixed IP, Vodafone Fixed IP and Multi-network SIMs.</p>

Features**Potential Benefits**

Private APN

Private APN enables resellers to set up private 4G networks. This solution is perfect for those customers that require enhanced security, as their traffic bypasses the public 4G internet (internet breakout is also available). It is also designed for customers that need remote access to 4G devices and want to avoid using static IP SIMs. The customer is in control of the mobile data traffic, facilitating bespoke routing, content filtering and ISP backup. Jola Private APN has no set-up charge and low monthly fees. It is quick to set up on Mobile Manager, can be used with SIMs located across the globe and is managed in real-time.

Business-grade Service Level Agreement

24/7 access to Jola's Technical Support Team.

Online management portal

Mobile Manager is our online management portal for ordering and managing estates of mobile data SIMs. Manage activations, ceases, suspensions, reports, alerts and bolt-ons for EE, Vodafone and O2 SIMs in real-time.
