

# JolaMobile

**JolaMobile** is a cost effective and flexible SIM-only business mobile service, which can easily be managed in our online management portal, Mobile Manager.

Features	Potential Benefits
SIM-only	Retain your existing handsets or upgrade to new handsets without being tied to an airtime contract. Many of our SIM packages are available on 30 day terms.
Range of cost-effective tariffs	Choose from voice, voice and data and mobile data tariffs, UK, European and Global packages.
Unlimited* UK 4G Data-only SIMs	Our unlimited* data SIMs are available on the O2 and Vodafone network. Tariffs are available on either 30 day, 12 month or 24 month contracts. These tariffs support 5G subject to device compatibility and network coverage.
EE M2M Roaming SIMs	Our EE M2M roaming SIMs are designed for M2M applications that require the EE network in the UK, EU and USA. They offer exceptional reliability and coverage and are now easy to manage and inexpensive to buy.
KPN M2M EU Roaming SIMs	Our KPN M2M EU roaming SIMs are designed for applications where it is critical to have an internet connection available 24/7, even in situations where one or more mobile networks become unavailable. These SIM cards are un-steered therefore have no preferred network and always connect to the strongest 4G signal whether at home or abroad. They offer exceptional reliability and coverage and are now easy to manage and inexpensive to buy. Packages also available with SMS enabled.
Pay-Per-GB (PPG)	10GB package available. Resellers pay-per-GB for any additional monthly data used.  PPG is available on 65 networks in the following 32 countries: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, United Kingdom.
Three Big Data SIMs	Our Three Big Data SIMs satisfy customers with high data requirements including those that need rugged SIMs in the UK.
Three M2M/IoT SIMs	Our range of IoT and M2M SIMs are available on the Three network and are designed for devices which require rugged and long-lasting SIMs at home or abroad. Our IoT SIMs are designed for low usage devices such as sensors and physical security. Our M2M SIMs are designed for higher usage SIMs such as tablets, PoS systems and kiosks. Bolt-ons are available for M2M SIMs. We have global coverage with very few exceptions. We have created a Tariff Tool to help select the tariff you need.
Choice of mobile networks	Our range of UK voice and data SIMs are available on either Vodafone or O2 networks. Our UK Mobile data SIMs are available on Vodafone, O2, EE or Three networks. JolaMobile supports 5G as standard as well as 4G.

Features	Potential Benefits
Data Pools	Partners select the type of data pool they require e.g. a Fixed Pool from 25GB to 10TB monthly data allowance, an Aggregated Pool, which changes size every time a SIM with data is added or removed or a Buffer Pool. Buffer Pools operate at an Account Level and can reduce data overage charges significantly. Data Buckets are available in 1TB increments and expire when the data is fully consumed or when it reaches its' 12-month expiry date – whichever happens first.
Private APN	Private APN enables resellers to set up private 4G networks. This solution is perfect for those customers that require enhanced security as their traffic bypasses the public 4G internet (internet breakout is also available). It is also designed for customers that need remote access to 4G devices, who want to avoid using insecure and expensive static IP SIMs. The customer is in control of the mobile data traffic facilitating bespoke routing, content filtering and ISP backup. Jola Private APN has no set-up fee and low monthly fees, is quick to set up on Mobile Manager, can be used with SIMs located across the globe and is managed in real-time.
eSIMs	Multiple mobile network operators MNO with all 4 UK networks included and access to over 450 networks in over 190 countries worldwide. Jola offers various options of eSIMs, including Pay Per Zone eSIMs, Fixed IP eSIMs and L2TP eSIMs. Resellers can order multi-network roaming connectivity, delivered via GSM-A-compliant, removable or embedded eSIMs, in Mobile Manager.
Business-grade Service Level Agreement	24/7 access to Jola's Technical Support Team.
Online management portal	Mobile Manager is our online management portal for ordering and managing estates of mobile data SIMs. Manage activations, ceases, suspensions, reports, alerts and bolt-ons for SIMs in real-time.

\* SIMs are not barred at 650GB but the 100% usage default alert is set here. If 650GB of data is consumed in 2 separate months in a 6 month period or we reserve the right to investigate whether the SIM is being used for non-standard purposes. See price list for further details.
